Electrical Services Introduction.

We would like to introduce to you our electrical maintenance and prevention services.

These services are beneficial, cost and time saving, ensuring longer, more stable power grids. While providing outstanding services, with emergency standby we are always ready to provide a full range of services, these are:

Mini-Sub Audits: Audits planned around client's discretion as to minimize production loss. Bi-yearly audits help to identify any problems that may arise in near future, in so allowing for proper maintenance planning.

Oil Analysis: We offer two types of Oil Analysis. The PCB level test that is done once a year to certify the PCB Level in the transformer oil. This test forms part of the Complete Oil Analysis, where the complete analysis includes:

Moisture
Dielectric Strength
Acidity
DGA
Furanatic
PCB Level Test
ICP (Wear Elements)
Viscosity @ 40Deg. Celsius
Include Sample Container and Collection of Samples.

Oil Purification: Same day oil purification done on-site.

Mini-sub Refurbishments: Per Quotation, LV & MV Rebuilds, 3rd Party Certification, All repairs and supplies to Mini-subs and switchgear.

New Mini-sub: Per Quotation, Per customer specification. Supply and install.

Emergency Power Generation: Supply, Service and Install Generators.
